

**Amendment to the Claims:**

The following listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1-5 (cancelled).

Claim 6 (new) Eyewear comprising:

- a) a lens adapted to cover a user's eyes, and
- b) sealing frames disposed adjacent opposed lateral edges of said lens each having an adhesive side;

wherein a first portion of said frames' adhesive sides is disposed along the lateral edges of the lens and a second portion of the frame extends beyond the lateral edges of the lens and is adapted to conform to the shape of a user's face.

Claim 7 (new) The eyewear as claimed in claim 6, wherein said frames each comprise a flexible, compliant and optionally elastic material that is adapted to conform to a user's face along said second portion and an adhesive material defining said adhesive side of said frame.

Claim 8 (new) The eyewear as claimed in claim 6, comprising more than one sealing frame at each lateral edge of said lens.

Claim 9 (new) The eyewear as claimed in claim 6, wherein said lens comprises a flexible, transparent thermoplastic material.

Claim 10 (new) The eyewear as claimed in claim 6, wherein said lens comprises semi-rigid or rigid, transparent material and has a contour that conforms to the shape and contours of a user's face adjacent the user's eyes.

Claim 11 (new) The eyewear as claimed in claim 6, wherein said lens contains at least one of an anti-fogging coating, UV protection coating, and water-shedding coating.

Claim 12 (new) The eyewear as claimed in claim 6, wherein said lens contains a notch defining a nose portion.

Claim 13 (new) The eyewear as claimed in claim 6, wherein said second portion is adapted for forming a seal between said frames and at least a portion of a user's face adjacent the lateral edges of said lens.

Claim 14 (new) Eyewear comprising:

- a) a lens adapted to cover a user's eyes comprising a first lens portion and second lens portions that overlap along a central portion of said lens, and
- b) sealing frames disposed adjacent opposed lateral edges of said lens each having an adhesive side;

wherein a first portion of said frames adhesive sides is disposed along the lateral edges of the lens and a second portion of the frame extends beyond the lateral edges of the lens and is adapted to conform to the shape of a user's face.

Claim 15 (new) The eyewear as claimed in claim 14, wherein said frames each comprise a flexible, compliant and optionally elastic material that is adapted to conform to a user's face along said second portion and an adhesive material defining said adhesive side of said frame.

Claim 16 (new) The eyewear as claimed in claim 14, comprising more than one sealing frame at each lateral edge of said lens.

Claim 17 (new) The eyewear as claimed in claim 14, comprising said first and second lens portions each comprises a flexible, rigid, or semi-rigid, transparent thermoplastic material, wherein said lens portions have differing colors or textures.

Claim 18 (new) The eyewear as claimed in claim 14, wherein said lens has a contour that conforms to the shape and contours of a user's face adjacent the user's eyes.

Claim 19 (new) The eyewear as claimed in claim 14, wherein said lens contains at least one of an anti-fogging coating, UV protection coating, and water-shedding coating.

Claim 20 (new) The eyewear as claimed in claim 14, wherein said lens contains a notch defining a nose portion.

Claim 21 (new) The eyewear as claimed in claim 14, wherein said second portion is adapted for forming a seal between said frames and at least a portion of a user's face adjacent the lateral edges of said lens.

Claim 22 (new) Eyewear comprising:

- a) a lens adapted to cover a user's eyes having opposed portions each defining a hole adjacent lateral edges of said lens, and
- b) sealing frames each overlaying said opposed portions of said lens and each having an adhesive side;

wherein a first portion of said frames adhesive sides is disposed along a perimeter of the portions of said lens and a second portion of the frame extends toward the interior of the lens portions and is adapted to form a seal between said frames and at least a portion of a user's face.

Claim 23 (new) The eyewear as claimed in claim 22, wherein said frames each comprise a flexible, compliant and optionally elastic material that is adapted to conform to a user's face along said second portion and an adhesive material defining said adhesive side of said frame.

Claim 24 (new) The eyewear as claimed in claim 22, wherein said lens comprises a flexible, transparent thermoplastic material.

Claim 25 (new) The eyewear as claimed in claim 22, wherein said lens contains at least one of an anti-fogging coating, UV protection coating, and water-shedding coating.
